

Dr. Norbert Reinsch

## Parent of Origin Effects in Livestock

29 July – 02 August 2024

### Description

This one-week summer course will focus on parent-of-origin effects, especially on the epigenetic phenomenon of genomic imprinting. You will learn how genetic analyses may accommodate for these effects and how appropriate models can be implemented in broadly used software programs.

### Our Goal

To give graduate students, postdocs, and faculty the opportunity to further their knowledge in developing genetic models for breeding and selection strategies

### Registration fee

445.00 CAD

### Housing

The University of Guelph offers Summer Accommodations. You can find more information at:

<https://housing.uoguelph.ca/summerhostel>

### How to register?

To register or inquire further, please email Ricarda Jahnel:

[rjahnel@uoguelph.ca](mailto:rjahnel@uoguelph.ca)

Registration will end by June 30, 2024
